Thank You!

Edison Wetlands Association

*enhances the quality of life in our
community by working to:*

- Protect human health by cleaning up toxic waste sites and restoring an ecological balance.
- Preserve and enhance water and land resources.
- Assist citizen groups to conduct clean-ups of their local communities.
- Protect open space and create biking/hiking trails and nature sanctuaries.
- Provide technical assistance to citizen groups in their efforts to identify and address issues impacting their environment.
- Provide environmental education in the classroom, on field trips, and through Eco-Tours.
- Promote public awareness of environmental issues.
- Manages only daily wildlife and conservation new site,
www.WildNewJersey.tv

EDISON WETLANDS ASSOCIATION

EWA believes in the possibility of clean, natural areas where people and wildlife coexist in harmony... areas where residents can walk and bicycle along beautiful greenways and people can once again safely eat fish from the Raritan River...places where everyone can discover that central New Jersey is a nature-lover's paradise.

EWA has a small staff and a large number of dedicated volunteers generously donating their time and energy to assure an environmentally sustainable future.

EWA was founded in 1989 in response to proposed development of environmentally sensitive wetlands in north Edison, and is a non-profit corporation with 501(c)(3) status.

EWA works with other environmental organizations, sports enthusiasts, concerned citizens, and like-minded politicians and companies to clean up, restore, and preserve wetlands and open space throughout central New Jersey.

EWA

The Raritan River Project

The Lower Raritan Watershed's environmental health has strongly rebounded through EWA's advocacy over the past decade, but there is a long way to go. EWA's Raritan River Project pursues the cleanup and restoration of the hazardous waste sites posing the greatest threats to human health and environment.

Community Assistance Remediation Program (CARP)

A disproportionate number of contaminated sites are located in underprivileged urban communities. Since many urban areas lack proper recreational opportunities children routinely play on toxic sites, often ingesting hazardous material through dermal absorption or consumption. CARP provides scientific and technical assistance to disadvantaged citizens groups at these sites.

EWA INITIATIVES CONT'D

Dismal Swamp Conservation

At over 1,240 acres, the Dismal Swamp Conservation Area serves as the largest contiguous wetlands left in northern Middlesex County. EWA leads the preservation campaign for this environmentally sensitive area. EWA's Triple C Ranch, a 40-acre farm in Edison, is used for public recreation and environmental education. EWA also manages www.WildNewJersey.tv, the only daily wildlife news site.

Brownfields-to-Greenfields (B2G)

B2G restores abandoned industrial sites as safe open space for conservation, recreation and public access. With over 25,000 brownfields in New Jersey, the benefits of greenfields include improved community health, environmental justice, economic revitalization and restored ecosystems.
